**DETAILED ACTION**

Claims 22-30, 40, 70, 73-74, 81-82, 90-97 and 98-164 are pending in the instant application. Claims 1-21, 31-39, 41-69, 71, 72, 75-80 and 83-89 have been canceled and claims 22, 26-29, 70, 73-74, 81-82 have been added as requested by applicants in the communication filed February 22, 2001.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of claims 22, 26-29, 70, 73, 81 and 82 under 35USC 112, second paragraph is withdrawn in view of applicants amendments and remarks as set forth in the communication filed 2-22-01.

The objections of claims 74 in paragraph (4) and 23-25, 30, 40 and 90-97 in paragraph (5) of the previous office action are withdrawn. The objections are withdrawn in view of the amendments to the claims and remarks as set forth in the amendment filed 2-22-01.

Art Unit: 1653

The following is a quotation of the appropriate paragraphs of 35

U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 22–26 are rejected under 35 U.S.C. 102(e) as being anticipated by

O'Mahony.

The reference teaches peptides that facilitate the transport of an active agent through human or animal tissue. The reference teaches bound peptides and peptide libraries. See the claims. The reference anticipates the instant invention claims which are drawn to a composition comprising a protein which binds a gastrointestinal tract receptor and is bound to an active agent. The reference teaches the instant invention proteins because there are no limiting characteristics of the instant invention proteins as claimed except that it bind to a GIT receptor. There are no structure, size, activity or other characteristics set forth to distinguish the instant invention proteins from the prior art proteins.

Art Unit: 1653

The prior art proteins are not excluded from the instant invention and are therefore anticipatory.

Claims 27-30, 40, 70, 73-74, 81-82, 90-97 and 98-164 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on

Art Unit: 1653

the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
